Aviation fuels are petroleum-based fuels, or petroleum and synthetic fuel blends, used to power aircraft. They have more stringent requirements than fuels used for ground use, such as heating and road transport, and contain additives to enhance or maintain properties important to fuel performance or handling. They are kerosine-based for gas turbine-powered aircraft. Piston-engined aircraft use gasoline and those with diesel engines may use jet fuel. By 2012 all aircraft operated by the U.S. Air

Aviation fuel - Wikipedia
