Oracle Berkeley DB Java Edition is an open source, embeddable, transactional storage engine written entirely in Java. It takes full advantage of the Java environment to simplify development and deployment.

### Oracle Berkeley DB Java Edition - JanusGraph

In Berkeley DB Java Edition, an object of class Environment is mandatory to work with a BDB database. The first step in opening the database is creating this Environment object will a call to "new Environment". The first argument to this call is the path where the data of the environment (including the databases in it) is located.

Berkeley DB Java Edition (JE) is a pure Java database management library. Its design resembles that of Berkeley DB without replicating it exactly, and has a feature set that includes many of those found in the traditional Berkeley DB and others that are specific to the Java Edition.

### Berkeley DB - Wikipedia

These parameters can be specified or individually by calling setConfigParam(java.lang.String, java.lang.String), through a Properties object passed to EnvironmentConfig(Properties), or via properties in the je.properties files located in the environment home directory. For example, an application can change the default btree node size with:

### EnvironmentConfig (Oracle - Berkeley DB Java Edition API)

The PrimaryIndex maps from id directly to the entity, or from primary key 1 to the "Jane Smith" entity in the example. The SecondaryIndex maps from department to id, or from secondary key "Engineering" to primary key 1 in the example, and then uses the PrimaryIndex to map from the primary key to the entity.. Because of this extra type parameter and extra level of mapping, a SecondaryIndex can ...

### SecondaryIndex (Oracle - Berkeley DB Java Edition API)

In this article, I'm going to cover the basics of using the Java Edition of Berkeley DB. We'll cover the basics of embedded databases, discuss Berkeley DB, and talk about some of the basic things you need to know in order to use it. Then, in part two, I will proceed through most of the details of implementing a session management system.
