Lemna minor - North Carolina Extension Gardener Plant Toolbox

A substantial number of Lemnaceae are invasive outside their natural distribution area. Lemna minuta is considered invasive in several European countries, where it can occur in the same habitat as invasive Azolla filiculoides and native Lemna minor. In this study the presence, abundance and growth rates of all three species were monitored across 24 natural ponds and in a series of mesocosms in ...

Frontiers | Competition Between Lemna minuta, Lemna minor ...

South Carolina was one of the original thirteen states of the United States. European exploration of the area began in April 1540, with the Hernando de Soto expedition, who unwittingly introduced new Eurasian diseases that decimated the local Native American population, because they lacked any immunity. In 1663 the English Crown granted land to eight proprietors of what became the colony.

History of South Carolina - Wikipedia

Moncks Corner is the fourth-fastest-growing town in South Carolina, with a 25 percent population increase in the past five years, according to town figures. Maintaining the feel of the "Lowcountry's
