The automatic transmission in the Ford Fiesta (2011-Present) and the Ford Focus (2012-Present) is not like a traditional transmission found in many cars. Technically, it is a dual-clutch transmission (more on that later) that operates differently than a traditional automatic. This type of transmission is often more fuel efficient than a traditional automatic, and in some cases, a more sporty drive.

I have a 2012 Ford Fiesta with a standard shift transmission. I was on my way to the store and the clutch seemed a little spongy when I depressed it. On the way home, the car became hard to shift and right before I got home, it was almost impossible to get it into 1st gear. After the car was turned off, it would easily shift into all the gears.
