Nikon I Ttl Flash Guide - mail.trempealeau.net

Nikon's current digital camera flash system, i-TTL, is very good. It's in the D2X, D200, D70, and D50. There are only two gotchas: 1.) The preflashes can be visible and make some subjects blink for every shot. Whoops! Use the flash exposure lock feature if your camera has it to eliminate the preflashes. 2.)

Nikon Flash Guide - Ken Rockwell

For example, E-TTL (Canon, Sony)) and i-TTL (Nikon) flashes fire a pre-flash right before the actual flash fires to do the same job. The flash then compares that pre-flash reading to the reading without flash and uses the information from both to set the power.

The Beginner's Guide to Using TTL flash: How it works, why ...

The main feature of the Nikon CLS system is the ability to use TTL metering with the remote flash. This is called i-TTL balanced fill flash. The Speedlight sends out pre-flashes before the main flash, which are then picked up by the flash units TTL flash sensor.
