Providing more security to Linux - SELinux System Administration - Second Edition Providing more security to Linux Seasoned Linux administrators and security engineers already know that they need to put some trust in the users and processes on their system in order for the system to remain

secure.

Providing more security to Linux - SELinux System ...

Enabling SELinux does not automatically start the enforcement of access. If SELinux is enabled and it cannot find a policy, it will refuse to start. That is because the policy defines the behavior of the system (what SELinux should allow). SELinux policies are generally distributed in a compiled form (just like with software) as policy modules.
