Domestication has played an enormous part in the development of humankind and material culture. It has resulted in the appearance of agriculture as a special form of animal and plant production. It is precisely those animals and plants that became objects of agricultural activity that have undergone the greatest changes when compared with their ...

Domestication | biology and society | Britannica

Language and culture. It has been seen that language is much more than the external expression and communication of internal thoughts formulated independently of their verbalization. In demonstrating the inadequacy and inappropriateness of such a view of language, attention has already been drawn to the ways in which one's native language is intimately and in all sorts of details related to the rest of one's life in a community and to smaller groups within that community.

Language - Language and culture | Britannica

Domestication of the English Language in the environments where it is used as Second Language (L2) of Foreign Language (EFL) is no more a bizarre phenomenon, but a welcome development because the language has today, emerged as a global one, therefore no longer an exclusive preserve of the British or its ancestral home.
