Algorithmic Trading Strategies and Modelling Ideas

A trading strategy or trading algorithm is a step by step set of instructions used to define the exact entry and exits. It consists of an idea which is then coded, analyzed, back-tested, optimized and run through a walk-forward analysis, prior to going live. This process can take multiple months to complete, but the final result should be a robust trading algorithm that can be considered for use with one of the existing Trading Systems or possibly be the genesis for a brand new system.
