Using Hundreds Chart To Subtract

Students add on the round number first, determine what still needs to be added, and then find the result using the hundred chart: In another activity, students complete the same task using subtraction.

How the Hundred Chart Helps Students Add & Subtract

Hundreds charts, or 120 charts, are used a lot in early elementary to help kids with a lot of mathematical concepts. In particular, they are often used for addition and subtraction. However, I have seen kids struggle way too much with this model, and they aren't learning the conceptual understanding through the model, and often I see kids using it as a crutch instead of actually thinking through the addition and subtraction.

IDEA 1: Hundreds Chart Warm Up Activities Warm Up Activity #1: How Far Apart? Provide each student with two chips or counters and a copy of a 100 chart. First highlight an important number to you.

Engaging Hundreds Chart Activities - Mr Elementary Math

- [Instructor] So what we have in this chart is all the numbers from one to 100 organized in a fairly neat way. It's a somewhat intuitive way to organize it where each row you have 10, so you go from one to 10, then 11 to 20, then 21 to 30, all the way to 100. And what we're gonna look at is interesting patterns that might emerge from this.
